Kemal Merdan
FULL STACK DEVELOPER

Work Experience

Intership Blue Duck
October 2022 - March 2023
- I worked at Blue Duck IT Solutions for four months & Services Company to an Austrian company, I was in charge of developing a web application that represented a dashboard. The main goal of the project was to create an application that would faithfully reproduce the design on the Figma platform, while ensuring high performance.

Unimetal Web App - Project
- I have created a Unimetal Web App. My task was to create a a functional website that will serve as a presentation tool their services and products. I designed the site to reflect that company identity, using their logo, colors and other branding elements.

Football Club Application - Project
- A football club application developed in Next.js, Node.js and MongoDB provides a comprehensive source of information about the club. On this website, club fans can find the latest news, player information, match schedule, team statistics and much more. Especially stands out the portal which publishes daily new articles about club events. In addition, the application allows the admin to update content and add news. With features such as dynamic content loading (SSR), fast navigation and responsive design, this application provides users with an intuitive and rich experience to follow all aspects of your favorite football club.
